

## CO2 Welder 220V 210A (MIGMAG2210)

### MIGMAG2210 CO2 Welder 220V 210A :

The MIG MAG gas shielded series welders can perfectly weld a variety of metals including carbon steel, alloy steel, aluminum and copper alloy, etc. Different alloy wires can be used according to the various alloy materials being welded.

### Features :

1. Perfect for thin and medium thickness sheet metal welding.
2. Spot weld two overlapped metal sheets from one side.
3. Adjusting soft start provides a smooth arc start.
4. Simple and economic wire feeder with motor.
5. Automatic voltage compensation provides stable current.
6. High productivity, good quality, no spatter, or spray arc and good visibility while welding.
7. Small heated area from welding, ensures small transformation and perfect welding shape.
8. Overload protection and overheating protection.

Technical Data MIGMAG2210 CO2 Welder 220V 210A	
Description	Data
Input Voltage	220V 50Hz
Input Power	5.7KVA

No Load Voltage	16 - 34V
Electric Welding Current Range	35 - 210A
Duty Cycle	25%
Wire Spool Diameter	15KG 300mm
Flux Core Wire	0.8 - 1mm
Wire For Steel	0.8 - 1mm
Insulation Class	F
Protection Degree	IP21S
Dimensions	920 x 390 x 640mm
Weight	71kg
