

CO2 Welder 380V 350A (MIGMAG2350)

MIGMAG2350 CO2 Welder 380V 350A :

The MIG MAG gas shielded series welders can perfectly weld a variety of metals including carbon steel, alloy steel, aluminum and copper alloy, etc. Different alloy wires can be used according to the various alloy materials being welded.

Features :

1. Perfect for thin and medium thickness sheet metal welding.
2. Spot weld two overlapped metal sheets from one side.
3. Adjusting soft start provides a smooth arc start.
4. Simple and economic wire feeder with motor.
5. Automatic voltage compensation provides stable current.
6. High productivity, good quality, no spatter, or spray arc and good visibility while welding.
7. Small heated area from welding, ensures small transformation and perfect welding shape.
8. Overload protection and overheating protection.

Technical Data MIGMAG2350 CO2 Welder 380V 350A	
Description	Data
Input Voltage	380V 50Hz
Input Power	11.1KVA
No Load Voltage	16 - 24V
Electric Welding Current Range	35 - 350A

Duty Cycle	25%
Wire Spool Diameter	15KG 300mm
Flux Core Wire	0.8 - 1.2mm
Wire For Steel	0.8 - 1.2mm
Insulation Class	F
Protection Degree	IP21S
Dimensions	880 x 440 x 1000mm
Weight	95kg
