

Double Turbine Central Vacuum (1600D)

- Turbine exhauster with double Sander capability and 9m double dust absorption pipes which enable 2 x sanders to work at the same time
- 3 phase electrical motor equipped with muffler produces the maximum noise of 78db, providing a comfortable and quite working environment.
- Double filtration enhances the dust extraction.
- The dust bucket can easily be separated making it more convenient to clear the dust.

Technical Data 1600D Double Turbine Central Vacuum	
Description	Data
Power Supply	380V 3 Phase
Current	8A
Power	2200W
Negative Pressure	2,245mm/H2O
Maximum Vacuum	200mbar
Noise	63dBA
Dimensions	500mm x 460mm x 1460mm
Power Outlets	2 x 220V
