

Paint Thickness Gauge (CM8822)

The Hurricane coating thickness gauge is used to measure the thickness of non-magnetic materials such as paint on magnetic materials. As accessories, the paint gauge includes different foil sets for various ranges.

Technical Data CM8822 Paint Thickness Gauge	
Description	Data
Display	4 digits, 10mm LCD
Range	0 ~ 1000um/0 ~40mil
Resolution	0.1um (0 ~ 99.9um) 1um (over 100um)
Power Supply	1.5 AAA (UM-3) Battery x 4
Size	161mm X 69mm X 32mm
Weight	260g including batteries

General Information

- The exclusive Micro-computer LSI circuitry and crystal time base offers high measurement accuracy and fast measuring times.
- It has a wide measuring range and high resolution.
- The digital display gives an exact reading with no guessing or errors.
- The use of durable, long-lasting components, including a strong, light weight ABS-plastic housing assures maintenance free performance for many years.
- The plastic housing has been carefully shaped to fit comfortably in either hand.
